

# AI (Artificial intelligence)

- Makes computers do things that require human intelligence

Ex.: image recognition, email spam filter, Chat GPT, etc

Ex Map:

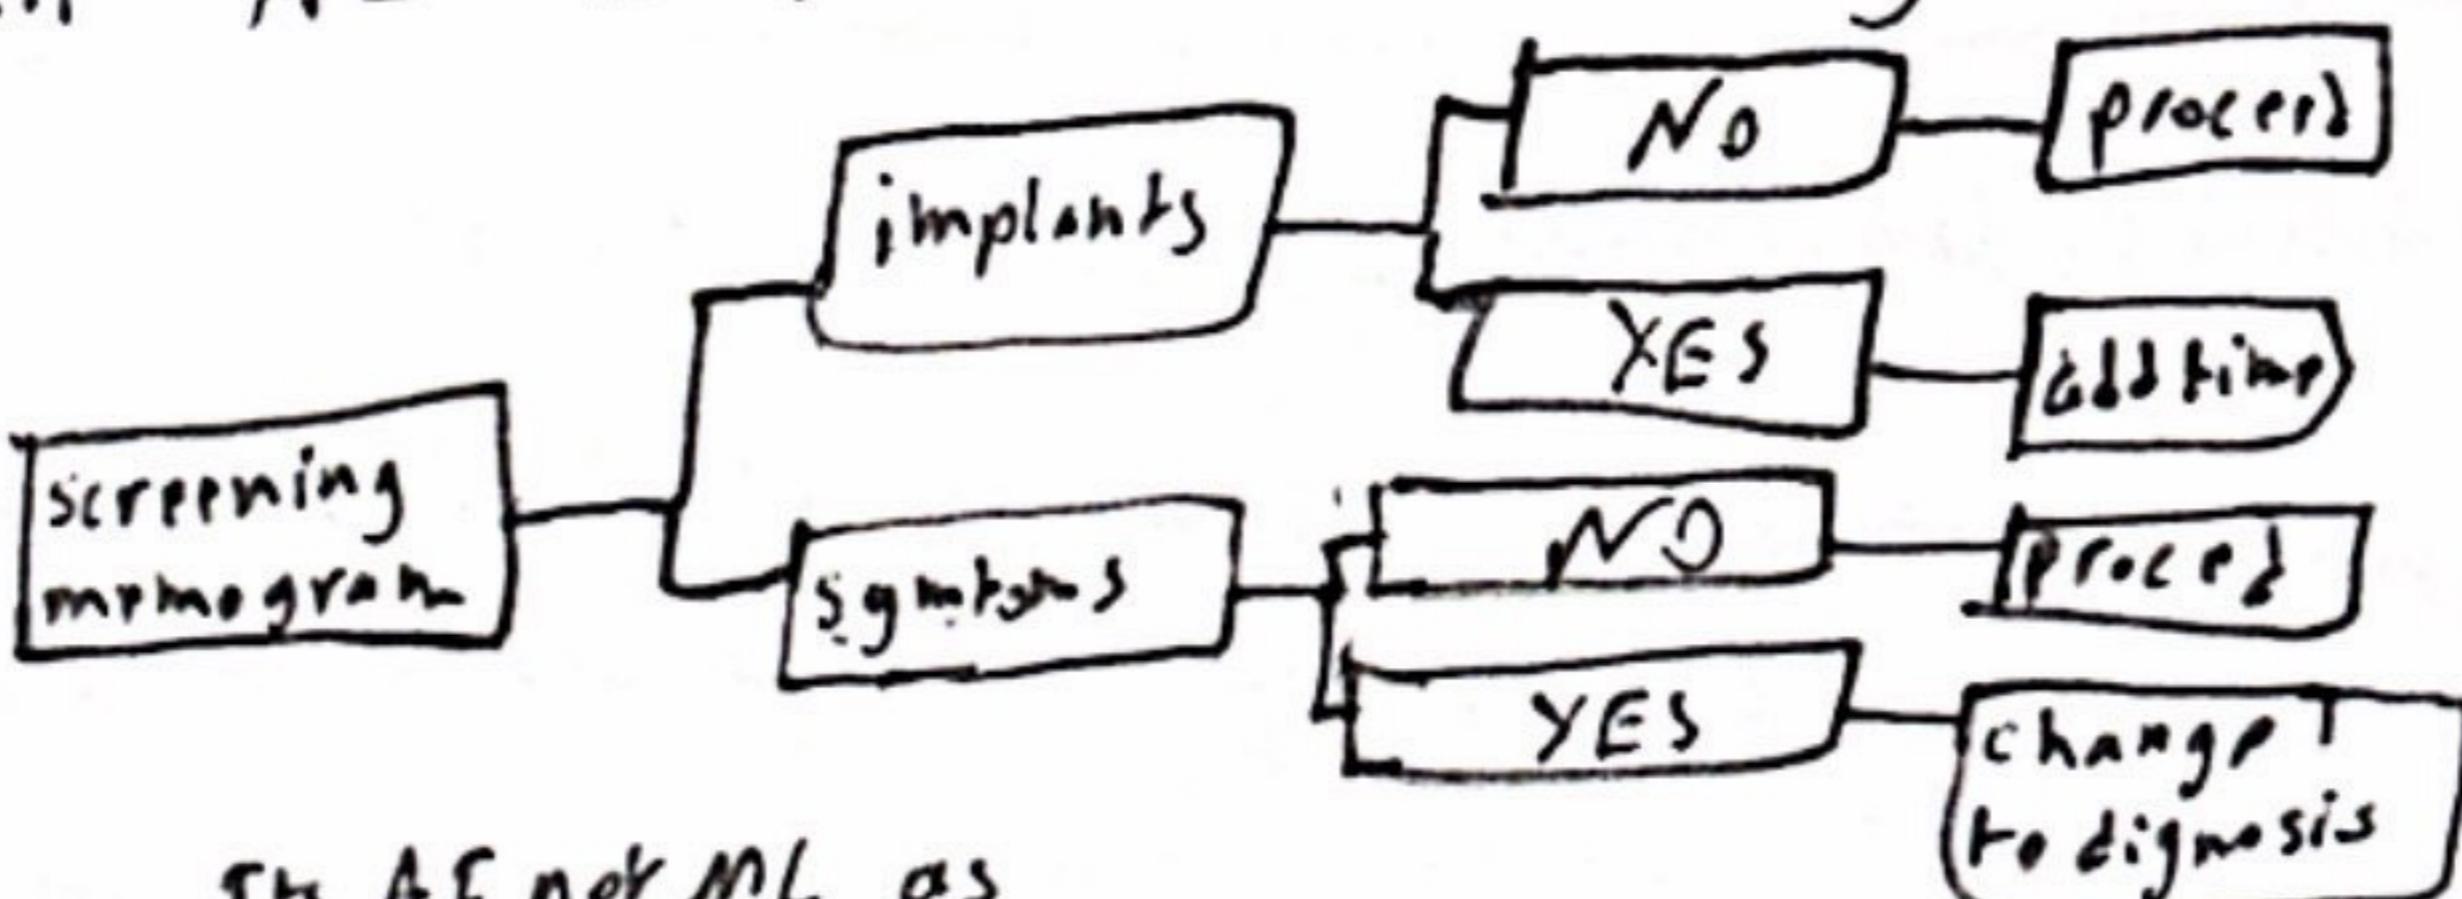

AI vs ML  
!(for what is ML  
visit page # 2)

- NOT all AI is Machine learning

Ex of  
AI

(A Rule-based  
system Ex.  
an algorithm)

Its AI not ML as  
No need to learn from data but mimics human intelligence

other Ex:  
chess bot,  
as they  
Follow Rules  
and don't  
learn from  
data
